

To,
The Project Supervisor
Department of Software Engineering
Bahria University, Islamabad

Subject: Letter of Support for Academic Project — Web Application Development for Medquad Health Solutions

Dear Sir/Madam,

We are writing this letter to officially confirm our support for the academic project being undertaken by the following student(s) enrolled at Bahria University, Islamabad:

1. Muhammad Abdullah Sarwar	01-131232-049
2. Aizaz Ahmad	01-131232-106

Medquad Health Solutions is a full-service biomedical imaging equipment company based in Islamabad, Pakistan. We specialize in the import, sale, installation, and maintenance of refurbished high-quality MRI scanners, CT scanners, X-Ray, and Ultrasound machines from internationally recognized brands including GE, Siemens, Toshiba, Hitachi, and Philips. We provide services to hospitals and clinical clients across Pakistan and internationally. As part of our digital transformation initiative, we have commissioned this web application as a **paid professional project** from the above-named student development team.

We hereby confirm and declare that:

1. The above-named students were formally engaged by our company under a **paid project agreement** and conducted requirements elicitation meetings with our management team to understand our operational workflows, business processes, and system needs.
2. We have reviewed and **officially commissioned** the project titled "**Medquad Health Solutions Web Application**" — a MERN Stack-based Hybrid Client/Staff Operations Portal designed to digitize our service ticket management, equipment catalog, predictive maintenance operations, and client communication portal.
3. This project has been undertaken on a contractual basis, and Medquad Health Solutions is the sole client and owner of the final deliverable upon project completion.
4. We have provided the students with relevant business information, real-world operational requirements, domain knowledge, and workflow details required for the successful completion of this project.
5. We are willing to extend our cooperation by providing guidance, feedback, and domain expertise to the students throughout the development lifecycle of this project.
6. We acknowledge that this project serves dual purposes — fulfilling the students' academic requirements at Bahria University while simultaneously delivering a production-ready business solution for Medquad Health Solutions, and we have no objection to its use as a university project submission.

This letter is issued to confirm both our financial engagement and academic support for this project. The project serves dual purposes — fulfilling the students' academic requirements at Bahria University while simultaneously delivering a production-ready business solution for Medquad Health Solutions. We wish the students the best in their academic endeavors.

Yours sincerely,

Mr. Waleed Nawaz

Chief Executive Officer

Medquad Health Solutions

Islamabad, Pakistan
